DYE SPRINGS

Best Quality, Guaranteed Longevity

EXCELLENCE IN DYEING

Features :

- Custom made to clients specification.
- Excellent resistance to compression.
- Quality assurance at all levels of production.
- Precision Limit.
- High resistant Stainless Steel 316/304.

Our Other Product Range :

- Yarn Dyeing Carrier
- Fibre Dyeing Carrier
- Beam Dyeing Carrier
- Dye Tubes
- Triangular Dyeing Spindles
- Perforated Dyeing Spindles
- Intermediate and Top Plates
- Gravity Locks
- Locking Caps
- Springs Loaded Locks
- Spacer for Dye Tubes
- Rapid Locks

PS Note: Please ask for brochure of these products

Advantages of Dye Springs :

It is of the smooth surface, wear-resistance and non-deformation, corrosion-proofness and anti-heat, long use life. It can ensure the dyed yarn quality.

It has wide using scope. It is applicable for the yarn & bobbin dyeing of cotton, wool, silk, linen, various fibres. It may form a complete set with various dyeing machines.

It is of the reasonable structure. It is the spring with mesh on four sides, with fine elasticity, good permeability, strong penetration force. It offers 85% of the open area, which design optimizes the flow of dye liquor uniformly all over the package leading to excellent dyeing results.

It causes equivalent savings in chemicals, water, heat energy and power consumption per kg of yarn dyed. It increases the loading of machines by 25 to 30%, resulting in higher production and lower cost.

Dye springs are durable and more economical than plastic tubes.

(We also undertake repairing of dye spring.)
